BLUETEST ACQUIRES GEFLE TESTTEKNIK (GTT)

Gothenburg, Sweden - November 2017 – Bluetest, the market leader in OTA Reverberation Test Systems, has completed the acquisition of Gefle Testteknik (GTT).

“GTT will bring extensive knowledge about base station testing to the group and we are very excited to be able to offer OTA solutions for both Mobile Devices and Base Stations.” said Kjell Olovsson, CEO of Bluetest. “OTA testing of Base Stations will become more and more important when 5G is entering into the networks and we are convinced that our combined resources can offer the market the best solution for that need”.

“Bluetest and GTT will together be a stronger company and that will be a great benefit for all our customers.” said Daniel Holback, Product Manager of GTT. “The development of the GTT RBS test solution will now accelerate and focus on, especially, 5G. “

The combined group will have solutions for production and development/verification test, for both Base Stations and Mobile Devices.

For local sales and support offices see <https://bluetest.se/contact-us>.

ABOUT BLUETEST

Bluetest is the pioneer and market leader in reverberation chamber technology for over-the-air (OTA) testing of wireless devices and small antennas. Bluetest’s innovative RTS system has been adopted by the largest mobile phone manufacturers, network operators, antenna manufacturers and other providers of wireless solutions.
